

Web Hosting

Citynet web hosting offers free email addresses, value-added services and exclusive "instant update" technology that allows you update your site without extensive HTML experience. Citynet's full domain hosting package includes 50MB of disk storage for your site, 45 free email accounts, a 30-page site use statistics summary each month, dial-up or ISDN access, unlimited FTP (file transfer protocol), and free forms handling. In addition, you also get Citynet's exclusive site administration pages, making site updates as easy as cut-and-paste. Here's a quick look at Citynet's full and basic domain hosting packages:

Citynet Web Hosting Plans**

*Additional web space is available at \$1.00/1MB.

**Citynet's full iTone product includes full domain web hosting at no additional cost.

Mirror Domains

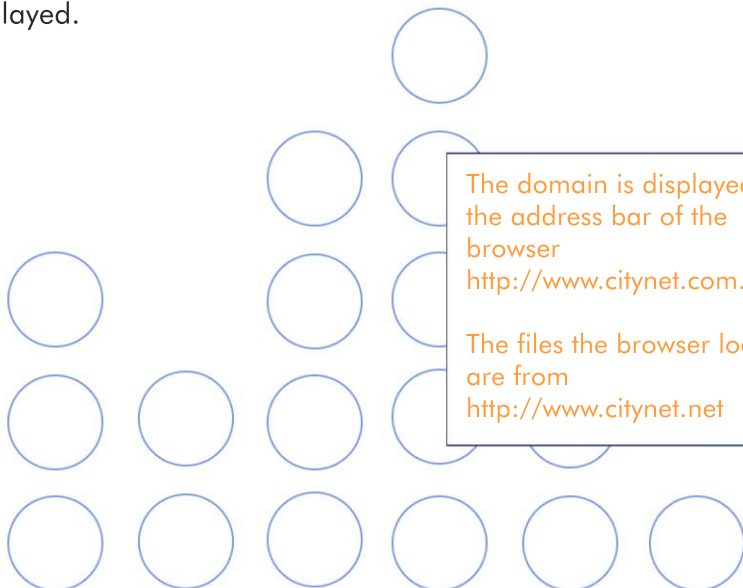

Mirror domains are additional domain names that are setup to point to your main site files.

For Example:

www.mysite.com is your main website. You then purchase another domain name, myothersite.com. Rather than maintaining two websites, i.e., two sets of files, you request that myothersite.com be a mirror of mysite.com.

Plan	Basic Domain	Full Domain
Monthly Hosting	\$25	\$50
Administration Pages	N/A	Included
Usage and Stat Reporting	N/A	Included
Dial-Up or ISDN-1B Access	Included	Included
Email Accounts (virtual)	30	45
Disk Storage	25mb*	50mb*
FTP (File Transfer Protocol)	Unlimited	Unlimited
Forms Handler	Included	Included

This means that no matter which site is called in a browser, the files for mysite.com will be displayed.

The domain is displayed in the address bar of the browser
<http://www.citynet.com>.

The files the browser loads are from
<http://www.citynet.net>
